FREE SPECIAL SCREENING

FOLLOWED BY A VIRTUAL PANEL DISCUSSION WITH WATER PROFESSIONALS

LEARN HOW HUMANITY IS ADAPTING TO HOW WE MANAGE WATER AS A PLANET

Featuring Matt Damon, this documentary is the first honest and hopeful documentary that paints an optimistic picture of how humanity is adapting new technologies and innovations to re-think how we manage water as a planet. The event is hosted by the Water Environment Federation (WEF), Nebraska Water Environment Association (NWEA), and the Nebraska Section of the American Water Works Association (NSAWWA). WEF is a proud sponsor of the documentary production. Students and professionals are invited to attend.

The event will open with a viewing of the 50 minute documentary followed by 45 minutes of discussion with a panel of local and national water professionals including Dr. Eileen O'Neill, former Executive Director of the Water Environment Federation as well as three local reclaimed industry professionals to present and answer questions about ways in which we are facing these challenges and taking steps towards the future nationally, and locally in Nebraska.

MONDAY, SEPTEMBER 28TH
6:00 – 8:00 PM

To receive a link to the virtual screening, please RSVP at nebwea.org
